EXPERIENCE

CTO

Nov 2025 - Present

LOVICI.FR, Guadeloupe, Full-remote

- Architected Go/Python backend for e-commerce platform handling product catalog, orders, and payment processing
 - Designed REST APIs and microservices with independent deployment, enabling parallel team velocity
 - Implemented CI/CD pipelines with GitHub Actions, Docker, and CloudFlare, reducing release cycle from days to hours
 - Led code reviews and technical decisions across the engineering team
-

CTO, Lead Dev & DevOps

Jun 2022 - Apr 2025

SAHA Technology, Antananarivo, Madagascar

- Led technical team of 5+ frontend and backend developers across multiple product lines
 - Built production infrastructure with Docker, managing staging and production environments
 - Recruited, onboarded, and mentored 5+ engineers, establishing coding standards and review processes
 - Served as primary technical contact for clients, translating business requirements into system architecture
-

Fullstack Developer (Python)

Aug 2021 - May 2022

Cloud Diodes, US, NY, Full-remote

- Built SaaS Docker container monitoring dashboard with real-time metrics and alerting using Django and Redis
 - Automated deployment pipelines and infrastructure provisioning with Bash and Docker Compose
-

PHP Developer

Feb 2021 - Jul 2021

Linkeo Madagascar, Antananarivo

- Integrated third-party payment gateway into existing PHP application, reducing checkout friction
 - Maintained and refactored legacy Symfony codebase, improving page load times
-

SysAdmin & Developer

Feb 2014 - Jan 2021

SIR Madagascar SARL, Ambohidratrimo

- Managed Linux server infrastructure (Ubuntu/Debian), network administration, and security hardening
 - Developed automation scripts for backups, deployments, and monitoring, reducing manual ops by 40%
 - Built internal tools and web applications for business operations
-

PROJECTS

Marketplace Manager

Go, Vue.js, PostgreSQL, Docker

Multi-marketplace management app (PrestaShop, Amazon) : Go backend, Vue.js frontend, PostgreSQL, distributed as Windows executable

hStream

Go, Gin, FFmpeg, Redis

HLS video streaming server with AES-128 encryption, automatic transcoding, and Docker deployment

ElderConnect

Django, DRF, Flutter, WebSocket

Multi-device platform (box, mobile, web) connecting elderly people with caregivers : real-time updates via WebSocket

EduStream

Django, Celery, Docker, Redis

Educational streaming platform with offline playback, background processing with Celery, and AES-128 encryption

dj

Go, Docker, Django

CLI helper for Django + uv : scaffold, manage, and deploy Django projects from the terminal

kpz

Go, DevOps, HTTPS

DevOps CLI toolkit for local HTTPS subdomain routing with automatic TLS certificates

TECHNICAL SKILLS

Languages : Go, Python, Dart, SQL, Bash, JavaScript

Frameworks : Go Gin, Django, DRF, Flutter, Vue.js, Celery, Redis

APIs : REST, GraphQL, gRPC, WebSockets

Cloud & DevOps : Docker, GitHub Actions, CloudFlare, NGINX

Databases : PostgreSQL, MySQL, SQLite, GORM, SQLAlchemy

EDUCATION

ISM Advancea

2012 - 2014

DTS Informatique

Software Engineering
